DETAILED ACTION

Allowable Subject Matter

Claims 1- 32 are allowed.

The following is an examiner's statement of reasons for allowance: Consider independent claims 1 and 18, the best prior arts of record found during the examination of the present application is: **Davis et al. (USPN 2003/0143987)**.

In view of the present application, Davis et al. discloses a method of maintaining a communication link with mobile terminal. The mobile terminal is connected to a intravehicular network while it is in the vehicle and provides handoff capabilities to the mobile terminal when it is removed from the vehicle and is no longer in the intravehicular network. The mobile terminal is handed off to a first extravehicular network.

Compared to the present invention Davis et al. fails to disclose the claimed limitations of a second extravehicular wireless network and a mobile network relay device comprising a vehicular mountable relay controlling and servicing the wireless device handoff between the second extravehicular wireless network and the first extravehicular wireless network.

In light of the cited references, the present invention is novel and non-obvious since the prior arts of record do not contain either explicitly or implicitly the limitations as a whole as disclosed in claims 1 and 18. In addition, any reasonable combination of the

Art Unit: 2618

cited references cannot be used to reconstruct the claimed invention. Therefore, the present application as claimed is allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
